Use Cases & User Stories
Code Clinic Booking System

This document outlines the key actors and their interactions with the system.guiding the design and development of the overall user experience, ensuring a seamless and effective interaction between users and the system.

Use Case Diagram

Use Case Descriptions

Volunteer Use Cases

Event	Description	User Story	Acceptance Criteria
View Available Time Slots	Volunteer views open time slots that match their availability.	I want to view open slots that I can use to schedule help sessions.	The system displays a list of open time slots that match the volunteer's availability.
Create New Help Session	Volunteer creates a new help session with a set duration.	I want to create a detailed help session so that students can book time with me.	The system allows the volunteer to create a help session, and it is reflected on their calendar, and the list of sessions.
View Own Help Sessions	Volunteer views a list of help sessions they have created.	I want to see a list of sessions I've scheduled so that I can manage them.	The system shows a list of all upcoming help sessions created by the volunteer.
Remove Own Help Session	Volunteer cancels a help session that they had previously created.	I want to cancel a help session so that students can reschedule.	The system allows the volunteer to remove a session, and it is reflected on their calendar, the list of sessions and the student.

Student Use Cases

Event	Description	User Story	Acceptance Criteria
View Available Help Sessions	Student views volunteer help sessions that match their own availability.	I want to view available help sessions that fit my schedule so that I can book with a volunteer.	The system displays a list of available help sessions including volunteer and session details.
Book Available Help Session	Student books an available help session with a volunteer.	I want to book a help session so that I can get help with a specific topic.	The system allows the student to book a session, and it is reflected on their calendar and the list of sessions.
View Own Booked Sessions	Student views a list of help sessions they have booked.	I want to see which sessions I have scheduled so that I can keep track of my upcoming appointments.	The system displays a list of all upcoming help sessions booked by the student, including session details.
Cancel Own Booked Session	Student cancels a help session that they had previously booked.	I want to cancel a booked session so that the slot becomes available.	The system allows the student to cancel a booking, and it is reflected on their calendar and the list of sessions.
